Claims 27-29 and 31-32 are pending in this application.

Claims 27-29 and 31-32 are rejected under 35 U.S.C. § 103 as being unpatentable over Deng (AQ) in view of Wang et al. (R) and Lin et al. (S) for reasons already of record. The applicants' remarks have been considered but are unpersuasive. Applicants' argue that the animal model in the bin et al. reference is not suggestive of oral administration. While Lin et al. may have used the term "oral administration" incorrectly (a point which does not concede), the reference is still suggestive of oral administration. As stated in the February 21, 1996 office action, it is well known in the pharmaceutical art to use intragastric gavage to approximate or model the oral administration of drugs to humans (see paragraph bridging pages 2-3 of the office action). The claims remain rejected under 35 U.S.C. 103.

No claims are allowed.
